A close-up portrait of Charles Darwin, showing his characteristic white beard and hair, looking directly at the camera with a serious expression.

“It is not the
strongest of the
species that
survives, nor the
most intelligent,
but the one most
responsive to
change.”

-Charles Darwin, 1809

GRACE PLASTOFAB

uPVC & WPC Derivatives

GRACE PLASTOFAB a company dedicated to a greener and better planet by not only crafting uPVC (Unplasticized Polyvinyl Chloride) and WPC (Wood Polymer Composite) products but also adding Grace to your dream home. Today's world demands excellent quality, eco friendly and cost effective UPVC & WPC profiles, a system already adopted by developed nations and with Grace Plastofab customers are assured of end to end customer service right from sight survey, selecting the appropriate designs, fabrication, delivery and installation. Grace Plastofab being a state of art unit can handle both individual homes and large scale projects with equal ease.

TECHNOLOGY

Highly precise and advanced European machinery from Cincinnati (Germany) and Kraussmaffie (Austria) by Yashashri Polyextrusion Ltd give these profiles an edge over others. High grade raw material and experience of more than two decades in uPVC compounding are the unique selling proposition of these profiles.

INTERNATIONAL STANDARDS

Extrusion of these uPVC profiles and the raw material used for it are based on International standards and are manufactured under strict vigilance of experienced workforce.

GUARANTEE

Grace Plastofab offers 10 years guarantee against manufacturing defects.

PRODUCTS

Windows are no longer an object to fill the openings in the building envelope. Today's windows are expected to perform various functions. Grace Windows undergo a strict quality control to make sure that our customers enjoy the best of their investment. The compounding and GI reinforcement inside the profile make it sturdy. These windows are specially designed to sustain extreme Indian weather conditions. Good insulation capacity allows it to contribute to a greener earth by reducing energy consumption of your cooling equipments. Live peacefully in a serene atmosphere far from the hustle bustle of the world by installing Grace's sound proof Windows. Dust and moisture proof wire mesh shutters take your comfort to a new high. Get away with the painfull process of painting and polishing. Available in different designs and styles with wide range of eye catching accessories install a Grace window and feel the difference in your lifestyle.

SLIDING WINDOWS

Enjoy obstruction free panoramic view of the nature and allow ample light to barge inside your house even at areas where there is space constraint with our special two track, three track and multi-track sliding window.

DOORS

To the people who love the idea of keeping up with time Grace brings to you very elegant yet functional uPVC as well as WPC Doors. Build out of hi-tech rust proof and rigid frames these doors make good friends with water as well and are resistant to termites and extreme weather conditions unlike its wooden counterparts. Easy to maintain, install, fire proof and free from the pain of painting and polishing these tailor-made doors stand out in all aspects compared to wood.

UPVC DOORS

Made out of high-tech rust proof and rigid extruded uPVC profiles, these doors are a complete value for money. These uPVC Door frames and shutters have been approved by DSR, CPWD, PWD, CIDCO, MHADA as well as Govt. of Haryana.

WPC DOORS

A door system that brings best of both worlds together, Wood Polymer Composite is a combination of wood and PVC making this unique product sells like hot cake in individual houses as well as large projects. These doors carry the aesthetic look of a classical door and at the same time provide us with the goodness of uPVC Doors. A range of designs and accessories give wooden doors a run for it's money. The flexibility to adopt laminates of your choice adds an extra edge to these door.

■ PREFAB STRUCTURES

A new edition to the world of uPVC is easy to install, lift & shift pre fabricated cabins. These cabins are the most convenient and preferred structures available in the market as on today. A wide range of applications ranging from Watchman cabins, toll collection booths, resorts, petrol pump cabins and canopies, life guard, lift and shift porta cabins for new construction sites, to providing sanitation solutions under swacha bharat abhiyan  and portable toilets for large scale events these cabins are tailor-made for our customers. Extremely easy to install these pre fab structures are very economical as well. WPC material can also be used for construction of Farmhouses and Tree houses as they replicate wood and add the merits of uPVC as well.

■ FALSE CEILING

Easiest and fastest to install, uPVC ceilings available in white and wooden finish are a great option for both residential and commercial spaces. Maintenance free and easy to clean these uPVC ceilings have started taking over the traditional POP used for ceilings.

■ PAPERING & PARTITION

The fastest and ultra modern way to build or renovate, more often in offices, hospitals or schools is the new uPVC partitions and paneling. These days engineers prefer easy to make and install uPVC partitions for places like schools, colleges, hospitals administrative buildings etc.
